

After falling in love with a U.S. Diplomat, I spent years moving around the world. Given my constant relocation, I developed a passion and appreciation for local food, architecture, and most of all, interior design. As I moved into each new house, I had to plan each space using the same furniture, a challenge I truly enjoy! As I worked hard to turn each house into a home, I found there was a rhythm to the process, and I enjoyed the challenge of each step: brainstorming ideas, finding solutions for different spaces, developing and implementing my ideas to create functional, livable spaces.

In working with clients to help with their design projects, I found that my ability to get along with others has been an important strength. I enjoy collaborative work, am a good communicator and team player, and have a terrific attention to detail.

These are all skills that allow me to thrive in a fast-paced work environment. I hope that I can leverage these skills as part of your team, and contribute to your company's mission!

Education

Student at NVCC Sterling VA
A.A.S Associate of Applied
Sciences. Graduation spring 2020

Honors

NVCC Deans List 2015- present

Associations

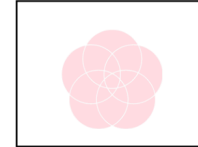

ASID - American Association of
interior Designers Student
Member
